EXPERIENCE

M&T Bank

SVP, Innovation Advisor | 06/2025 – Present

- Led executive stakeholders through an effort to reimagine our investment platform based in advisor- and client primary research. Outcomes include replacing our tech stack, testing AI solutions for servicing, redefining our sales process, and a new customer research governance process for ultra high net worth clients at M&T.
- Designed and facilitated a workshop with 15 cross-disciplinary leaders within Wilmington Trust to identify digital asset use cases in Institutional Client Services. In December of 2025 the resulting pilot, M&T's first digital assets activation, achieved an instantaneous cross-border transfer versus the existing standard of 3-5 business days.
- Co-developed a strategy to combine M&T's 7 customer-facing apps into 2, introducing a feature set that transforms our value proposition through emerging technology and new proposed services that are being tested with customers and prospects.
